Test Results

Test	Status	Details
Full dry-run (all 5 phases)	✓ PASS	All phases executed in sequence without errors
Phase selection (delegation,bloodhound)	✓ PASS	Only phases 4 & 5 ran; phases 1-3 correctly skipped
Tool availability checks	✓ PASS	8 tools checked; graceful skip for missing tools
Phase 4 — Delegation Discovery	✓ PASS	Runs; skips LDAP queries when ldapsearch unavailable
Phase 5 — Bloodhound Collection	✓ PASS	Skips with credential warning when unauthenticated
Author attribution	✓ PASS	All 26 .py files contain “Andrews Ferreira”
Git commit	✓ PASS	Clean commit on master (fd8fc39)

Bug Fixed During Testing: Removed stray netexec_parser kwarg passed to DelegationDiscoveryPhase.__init__() in ad_module.py .
