

# ReconForge — Documentation Map & Canonical Source Reference

**Purpose:** Defines which document is the canonical (authoritative) source for each topic. When multiple documents cover the same topic, this map designates the primary source and lists secondary references.

Last updated: 2026-03-21

## Canonical Source Assignments

### Architecture & Design

| Topic                    | Canonical Source                                                                                     | Secondary References                                                                                                                       |
|--------------------------|------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| System architecture      | <a href="#">ARCHITECTURE.md</a> (ARCHITECTURE.md)                                                    | <a href="#">README.md</a> (../README.md),<br><a href="#">DOCUMENTATION_INDEX.md</a> (DOCUMENTATION_INDEX.md)                               |
| Module architecture      | <a href="#">MODULES.md</a> (MODULES.md)                                                              | Module-level READMEs ( modules/*/README.md )                                                                                               |
| AD module internals      | <a href="#">modules/ad/README.md</a> (../modules/ad/README.md)                                       | <a href="#">AD_MODULE_SUMMARY.md</a> (AD_MODULE_SUMMARY.md),<br><a href="#">modules/ad/ARCHITECTURE.md</a> (../modules/ad/ARCHITECTURE.md) |
| Web module internals     | <a href="#">modules/web/README.md</a> (../modules/web/README.md)                                     | <a href="#">WEB_MODULE_SUMMARY.md</a> (WEB_MODULE_SUMMARY.md)                                                                              |
| API module internals     | <a href="#">modules/api/README.md</a> (../modules/api/README.md)                                     | <a href="#">MODULES.md</a> (MODULES.md)                                                                                                    |
| Network module internals | <a href="#">modules/network/README.md</a> (../modules/network/README.md)                             | <a href="#">MODULES.md</a> (MODULES.md)                                                                                                    |

## Configuration & Setup

| Topic                        | Canonical Source                                                                     | Secondary References                                                 |
|------------------------------|--------------------------------------------------------------------------------------|----------------------------------------------------------------------|
| Tool & profile configuration | <a href="#">CONFIGURATION.md</a> (CONFIGURATION.md)                                  | <a href="#">FAQ.md</a> (FAQ.md), <a href="#">SETUP.md</a> (SETUP.md) |
| Installation & prerequisites | <a href="#">SETUP.md</a> (SETUP.md)                                                  | <a href="#">README.md</a> (../README.md)                             |
| Platform support             | <a href="#">SUPPORT_MATRIX.md</a> (SUPPORT_MATRIX.md)                                | <a href="#">SETUP.md</a> (SETUP.md)                                  |
| Config schema migration      | <a href="#">MIGRATION_CONFIG_SCHEMA.md</a> (MIGRATION_CONFIG_SCHEMA.md) (historical) | <a href="#">CONFIGURATION.md</a> (CONFIGURATION.md)                  |

## Usage & Operations

| Topic                  | Canonical Source                                      | Secondary References                                                                   |
|------------------------|-------------------------------------------------------|----------------------------------------------------------------------------------------|
| CLI reference          | <a href="#">USAGE.md</a> (USAGE.md)                   | <a href="#">README.md</a> (../README.md), <a href="#">FAQ.md</a> (FAQ.md)              |
| Workflow orchestration | <a href="#">WORKFLOW_GUIDE.md</a> (WORKFLOW_GUIDE.md) | <a href="#">USAGE.md</a> (USAGE.md), <a href="#">ARCHITECTURE.md</a> (ARCHITECTURE.md) |
| Operational runbooks   | <a href="#">RUNBOOKS.md</a> (RUNBOOKS.md)             | <a href="#">USAGE.md</a> (USAGE.md), <a href="#">FAQ.md</a> (FAQ.md)                   |
| Troubleshooting        | <a href="#">FAQ.md</a> (FAQ.md)                       | <a href="#">LIMITATIONS.md</a> (LIMITATIONS.md)                                        |

## Findings & Severity

| Topic                       | Canonical Source                                            | Secondary References                                                                                         |
|-----------------------------|-------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------|
| Findings system             | <a href="#">FINDINGS.md</a> (FINDINGS.md)                   | <a href="#">ARCHITECTURE.md</a> (ARCHITECTURE.md), <a href="#">EXTENDING.md</a> (EXTENDING.md)               |
| Severity criteria & scoring | <a href="#">SEVERITY_CRITERIA.md</a> (SEVERITY_CRITERIA.md) | <a href="#">FINDINGS.md</a> (FINDINGS.md)                                                                    |
| Confidence model & clamping | <a href="#">FINDINGS.md</a> (FINDINGS.md)                   | <a href="#">SEVERITY_CRITERIA.md</a> (SEVERITY_CRITERIA.md), <a href="#">LIMITATIONS.md</a> (LIMITATIONS.md) |

## Development & Extension

| Topic                           | Canonical Source                                                | Secondary References                                                                                 |
|---------------------------------|-----------------------------------------------------------------|------------------------------------------------------------------------------------------------------|
| Development guidelines          | <a href="#">DEVELOPMENT.md</a> (DEVELOPMENT.md)                 | <a href="#">CONTRIBUTING.md</a> (../CONTRIBUTING.md)                                                 |
| Extension guide                 | <a href="#">EXTENDING.md</a> (EXTENDING.md)                     | <a href="#">DEVELOPMENT.md</a> (DEVELOPMENT.md), <a href="#">API_REFERENCE.md</a> (API_REFERENCE.md) |
| API reference (classes/methods) | <a href="#">API_REFERENCE.md</a> (API_REFERENCE.md)             | <a href="#">EXTENDING.md</a> (EXTENDING.md)                                                          |
| Contributing guidelines         | <a href="#">CONTRIBUTING.md</a> (../CONTRIBUTING.md)            | <a href="#">DEVELOPMENT.md</a> (DEVELOPMENT.md)                                                      |
| Integration testing             | <a href="#">INTEGRATION_TESTING.md</a> (INTEGRATION_TESTING.md) | <a href="#">DEVELOPMENT.md</a> (DEVELOPMENT.md)                                                      |
| Versioning policy               | <a href="#">VERSIONING.md</a> (VERSIONING.md)                   | <a href="#">CHANGELOG.md</a> (../CHANGELOG.md)                                                       |

## Terminology & Naming

| Topic             | Canonical Source                                | Secondary References            |
|-------------------|-------------------------------------------------|---------------------------------|
| All terminology   | <a href="#">TERMINOLOGY.md</a> (TERMINOLOGY.md) | —                               |
| Known limitations | <a href="#">LIMITATIONS.md</a> (LIMITATIONS.md) | <a href="#">FAQ.md</a> (FAQ.md) |

---

## Historical Documents

---

These documents are preserved as historical records. They reflect the project state at the time of writing and are **not maintained**.

| Document                                                                          | Date       | Description                                |
|-----------------------------------------------------------------------------------|------------|--------------------------------------------|
| <a href="#">AUDIT_REPORT.md</a><br>(AUDIT_REPORT.md)                              | 2026-03-17 | Comprehensive technical audit              |

## Module-Level Documentation

| Document                                                                                             | Canonical For                                  |
|------------------------------------------------------------------------------------------------------|------------------------------------------------|
| <a href="#">modules/network/README.md</a> (../modules/network/README.md)                             | Network module tools, phases, parsers          |
| <a href="#">modules/web/README.md</a> (../modules/web/README.md)                                     | Web module tools, phases, parsers              |
| <a href="#">modules/api/README.md</a> (../modules/api/README.md)                                     | API module tools, phases, parsers              |
| <a href="#">modules/api/HARDENING_CHANGELOG.md</a> (../modules/api/HARDENING_CHANGELOG.md)           | API module hardening history (historical)      |
| <a href="#">modules/ad/README.md</a> (../modules/ad/README.md)                                       | AD module tools, phases, collectors, analyzers |
| <a href="#">modules/ad/ARCHITECTURE.md</a> (../modules/ad/ARCHITECTURE.md)                           | AD module architecture details                 |
| <a href="#">modules/surface/SURFACE_INTELLIGENCE.md</a> (../modules/surface/SURFACE_INTELLIGENCE.md) | Surface intelligence engine                    |

## Cross-Reference Rules

1. **Do not duplicate detailed explanations.** When a non-canonical document discusses a canonical topic, add a cross-reference: > See [CANONICAL\_DOC.md](CANONICAL\_DOC.md) for details.
2. **Canonical sources are authoritative.** If a secondary reference conflicts with the canonical source, the canonical source is correct.
3. **Historical documents are frozen.** Do not update historical documents to match current state — they reflect the project at a specific point in time.

4. **Module READMEs are canonical for module internals.** `docs/MODULES.md` provides the overview; module-level READMEs provide implementation details.
